

## smart DEX Integration.

Penelope Case Management fully integrates DSS / DEX service tracking and reporting requirements into a streamlined practitioner-friendly workflow.

Not only will Penelope automatically upload your data securely to DSS servers via an automated web service, you can take advantage of the many additional outcomes evaluation, assessment and goal planning tools available for agencies participating in the expanded “partnership approach”.

Penelope’s integrated approach incorporates DSS tracking elements as natural parts of the practitioner’s workflow - allowing DSS / DEX reporting to be mostly a by-product of everyday clinical and administrative operations. Our DSS/ DEX integration includes:

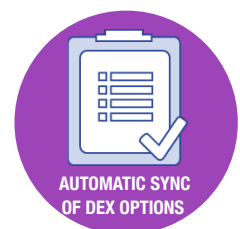

- ✓ DSS Client Information
- ✓ Certificates/ Parenting Agreements
- ✓ DSS Session Information
- ✓ DSS Session Assessments
- ✓ DSS Client Assessments
- ✓ DSS Goal Planning
- ✓ Agency Outlet Information

**Streamlined.**

**Automatic.**

**Easy.**
