

Standard Assessments in Penelope

Reduce Manual Tasks, Improve Efficiency, and Stay Compliant

For many social service organizations, building industry-standard documents and assessments in their client management system can take a great deal of time, effort, and cost.

Also, depending on the flexibility of the client management system being used, complying with the structured layout and format of the documents may not always be an easy task.

To help ease this burden, Athena Software has created a suite of pre-built documents and assessments with measures that focus on a variety of personal and social metrics including:

- ▶ **Mental wellbeing**
- ▶ **Substance use**
- ▶ **Relationships**
- ▶ **Overall quality of life**

Available assessments include:

PHQ-9	DASS-21 and DASS
K10	SACS (Substances and Choices Scale)
Rosenberg Self-Esteem Scale	WHOQOL-BREF
Edinburgh Postnatal Depression Scale	Geriatric Depression Scale (short form)
GAD-7	MAST
ACE (Adverse Childhood Experience)	Couples Satisfaction Index
PCL-5	Multi-dimensional Psychological Flexibility Inventory

Each document comes with an annual administrative fee at a fraction of the cost to build each one.

Why you should get them:

- Avoid getting caught up with repetitive tasks and focus on your core deliverables
- Reduce chances of manual errors or entering inaccurate information in the wrong fields
- Stay compliant with industry requirements by using standard documents and formats
- Save on the cost of maintaining and updating these documents regularly to comply with industry changes. Athena will support each document and update them for you!

How to get them:

Contact us or, if you're already using Penelope, speak to your Account Manager for details and learn how you can obtain a one-time special FREE courtesy package of THREE assessments - PHQ-9, K10, and the Rosenberg Self-Esteem Scale.
